Your help is urgently needed if the American veteran of the Korean War is not to remain the forgotten veteran. Congress has given the American Battle Monuments Commission (a small agency of the Federal government) only five years to raise $6 million with which to construct a Korean War Veterans Memorial on the Mall of the Nation's Capital with funds obtained through private contributions. To date $2.5 million has been raised. This is your opportunity to help give recognition to the 5,700,000 U.S. Veterans of the Korean War who helped to liberate the South Korean people from the communist invaders from the north. This incredibly courageous effort contributed so much to the stability, economic advancement and growth of democracy in that nation and the Asian-Pacific region. No donation is too large or too small. Please send your tax deductible contribution to:
